Dear Sir:

In response to the Official Action mailed October 4, 2002, please enter the following Amendment:

IN THE CLAIMS:

1. (Amended) A network management system, comprising:

a network;

a plurality of telephony devices coupled to said network; and

a server, said server including an auto-discovery unit configured to make a determination of the presence of configurable components associated with said plurality of telephony devices on said network by communicating with said telephony devices, said server further configured to provide a graphical user interface (GUI) based network map of said configurable components, wherein said server is further configured to propagate said configuration information to others of said configurable components.
